

Student Success Initiative

Developmental Math Reform Status Report, April-May 2016

Achievements in this period

The team has been communicating via email, however, Jenny has been meeting with Florencio Diaz, and Charlotte Greenblatt. Charlotte will be helping in the design of the corequisite courses, and is currently teaching SEW, testing some of our materials.

Jenny and Charlotte have chosen two texts for Math 090/088. We are testing one of these in a pilot this summer. Jenny negotiated the pilot with McGraw Hill for the use of ALEKS, and as a result, they provided free access to the program and ebook for all of the Summer Enrichment Workshop Math students. We are using this to test this program's use for 090/088 for Fall.

Robyn and Jenny have met and finalized a textbook, course schedule, and have begun discussing class projects for the 075/118 corequisite.

Open Issues:

Finalize the textbook/online resources for Math 090/088.

Key Decisions

Textbooks chosen for Math 075/118, two chosen for Math 088/090.

Teaching Assistant chosen to assist building and analyzing the Math 088/090 start up in Fall.

Goals for next period:

Finalize the decisions on textbooks, online resources, and structure for Math 088/090 by analyzing preliminary results for SEW.

Progress Indicator:

Team Lead: Jenny Ross

Team Members: Martina Bode, Dave Marker, Brooke Shipley
